

Project Design Phase-II
Data Flow Diagram & User Stories

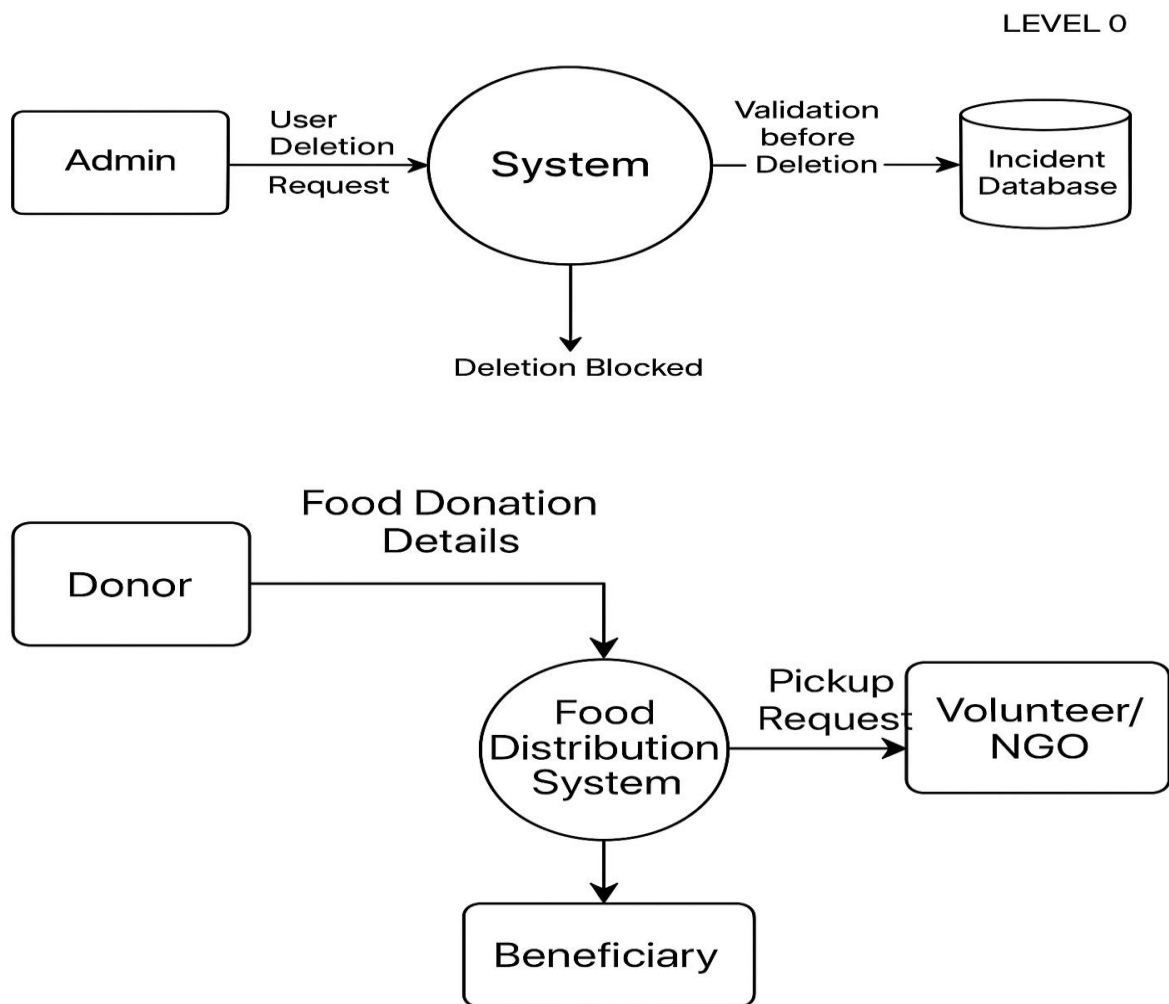

Date	03 November 2025
Team ID	NM2025TMID03627
Project Name	To Supply Leftover Food to Poor
Maximum Marks	4 Marks

Data Flow Diagram (DFD)

Describes how user deletion requests flow through the system:

- Interaction between Admin, System, and Incident Database.
- The system checks if the user is linked to any active incident.
- If assigned, deletion is blocked to maintain data integrity.

Data Flow Diagram Deletion if Assigned to an Incident

User Stories

Each story describes user goals and system behavior.

User Type	Epic	Story No.	User Story	Acceptance Criteria	Priority	Release
Administrator	User Management	USN-1	As an admin, I want to delete a user from the system.	Deletion allowed only if user isn't assigned to any incident.	High	Sprint-1
System (Auto-check)	Validation before Deletion	USN-2	As a system, I must check if the user is linked to any incident before processing a delete request.	Deletion proceeds only if no incident is assigned; else, blocked.	High	Sprint-1
Incident Manager	Alert Notification	USN-3	As an incident manager, I want to receive an alert if a user with assigned incidents is requested for deletion.	System shows warning/alert about linked incidents before deletion.	Medium	Sprint-2
